

It's for MS Dynamics CRM on-Premise, hosted (IFD) and CRM online. Activity Calendar is a Microsoft Dynamics CRM add-on enhancement that allows organizations to be more joint effort interactive participation by allowing user to view Activities in the CRM calendar of multiple users within their organization

The screenshot shows the 'SelectEntity' and 'Existed Entities' sections. Under 'Selected Entities', a list includes Campaign, Campaign Activity, Case, Contract, Invoice, Lead, Opportunity, Order, and Queue. Below this list are checkboxes for 'Form', 'HomePage', and 'SubGrid', and an 'Add' button. The 'Existed Entities' section shows a list with 'account' and 'contact'. Below this list are 'Update' and 'Get Relation' buttons. To the right, another list shows 'equipment', 'contact', 'systemuser', 'lead', 'salesorder', 'incident', 'opportunity', 'contract', and 'invoice'. Further right, a list of relationships includes 'originatingleadid' (checked), 'customerid', and 'parentaccountid', with a 'Save' button at the bottom.

How does it benefit an Organization?

- CRM user to view Activity calendar
- All activities like phone, appointment, task etc. are available to view in calendar
- Displays activities for one or more users
- Relationship between Account & Activity
- Relationship either on 1: N relation or N: 1 relation
- Simple overview to control conflicts
- One simple Calendar for one and all
- View calendar as per your choice – day, week, month, year
- User specific rights assigned for every user
- Filter the results as you're your need
- Acts as Office admin tool for the executives
- Drag and Drop facility to move activities across date
