

Multi-File Uploader

Microsoft Dynamics CRM

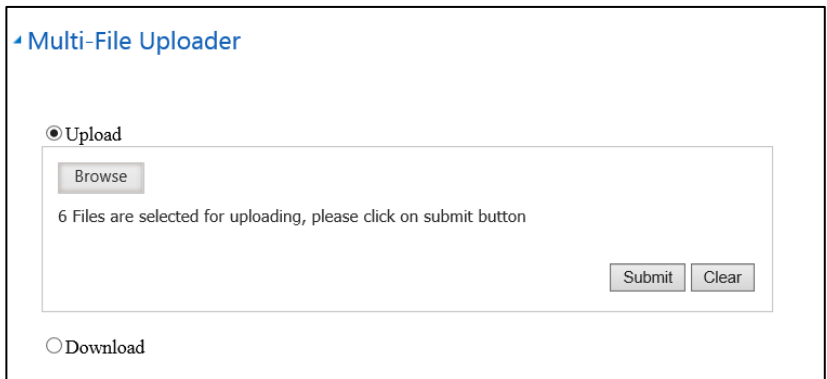

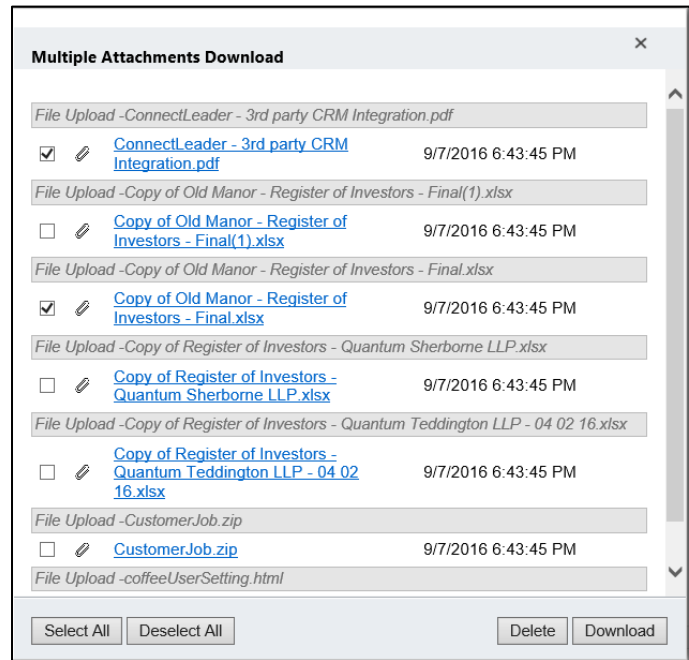

Multi-File Uploader is a simple yet effective Microsoft Dynamics CRM Add-on that will undeniably add great value to your business operations.

The main purpose of Multi-File Uploader is to allow CRM users and administrators to upload/download multiple files (word, excel, pdf, WinRAR, etc.) to various entities (e.g. accounts, contacts, etc.) which is otherwise not possible through simple CRM functionality. As a result, CRM users and administrators are largely benefitted as they can now upload/download all important files at one go saving time and energy while enhancing the productivity.

Multi-File Uploader works fluidly on your MSCRM 2015 and 2016.

How does it benefit your Organization?

- Enhance productivity by enabling your people to upload/download multiple files at one go
- Save time and energy which can be used elsewhere for accomplishing your business goals
- Flexibility to apply Multi-File Uploader to one or many entities available inside MSCRM
- All file formats including Word, PDF, Excel, and WinRAR supported
- Multi-File Uploader is easy to configure and use so that you can get started immediately
- Brings more professional look and helps you to stay organized with immediate access to your files
